Deliberative Process/Ex. 5

They have been running stories all day. They want to know who caused the spill, where the water came from, who is being held accountable and when we're going to have answers on when the water is safe to go in. They're also focused on the local businesses that are being impacted.

Hi David,

Just wanted to make sure you saw this.

Also - trying to figure out how many people use water from the Animas River for drinking water, and to what extent water from this river is used to irrigate crops. I asked folks at the local emergency preparedness department and they said I had to ask the EPA. I'm writing my story now and so need to talk to someone very soon.

Many thanks.

Elizabeth

Dear David,

Hello! Thank you for your voicemail. I'd love to take you up on your offer to speak with your toxicologist. After reading the results on the EPA's website, the toxicologists I've spoken with are concerned about high levels of several metals, including arsenic, cadmium, and lead. I made a PDF out of the findings and attached it on this email - I've highlighted the ones the experts are concerned about. I'm on deadline and need to speak with your expert ASAP.

Many thanks.

Elizabeth
